

# CALLING REPRO VETS!

Are you interested in helping with sample collection for a clinical research study?

If so, please help us out by collecting bloods from Thoroughbred mares with retained fetal membranes this coming stud season (2024)

- We need one red and one green top blood tube
  - Taken with 24 hours of foaling
  - From mares that have retained for > 4 hours
- Dropped to Anglesey Lodge Equine Hospital Lab (R51 HK85), the same day

The study is looking at **blood ionized calcium concentrations in Thoroughbred broodmares with and without retained fetal membranes**

For further information and to request submission and consent forms please contact [0874891809](tel:0874891809) or [sarahross60@hotmail.com](mailto:sarahross60@hotmail.com)
