

Ambulatory Equine Veterinarian with an Interest in Orthopaedics

€55,000 - €80,000

SES EQUINE VETERINARY SERVICES (KILDARE/WICKLOW) is seeking an experienced ambulatory equine veterinarian with a particular interest in lameness and orthopaedics to join our team in a full-time role. Our team comprises three vets, increasing to five vets during the breeding season, supported by one veterinary nurse.

We are a fully ambulatory practice providing comprehensive routine care and an out-of-hours emergency service. Our clients include Thoroughbred flat and National Hunt racing yards, stud farms, sport horse performance yards and breeding facilities, as well as a large leisure horse client base. This variety provides a broad mix of clinical work, including a substantial stud and reproductive caseload and a strong and growing lameness and orthopaedic caseload.

Our loyal clients value the dedicated care we provide. Teamwork, camaraderie and mutual support are central to how we work. Our ideal candidate will:

- Be competent in managing an orthopaedic caseload, conducting in-depth lameness investigations and developing treatment protocols.
- Have excellent communication skills and the ability to collaborate with clients and fellow team members.
- Enjoy all aspects of general equine ambulatory practice, including reproductive work during the breeding season.

We aim to support a sustainable work-life balance for all team members and we offer a generous package that includes:

- A salary of €55,000 - €80,000, commensurate with experience.
- Payment of VCI registration and VDS membership fees.
- A work vehicle.
- A CPD allowance and support for further education.
- Time off in lieu of out-of-hours duties.
- Flexibility for the right candidate.
- Teaching opportunities.

To apply, please send your CV and cover letter to sesveterinary@gmail.com or apply through our website at www.sesequinevets.ie.
