

EQUINE VETERINARY SERVICES

Stud Season 2027
Fixed Term Equine Veterinarian Position

SES Equine Veterinary Services (Kildare/Wicklow) is seeking an enthusiastic equine veterinarian with stud experience to join our team of 4-5 vets and 1 veterinary nurse for a fixed-term breeding season position, from February/March to July/August 2027.

Our team has an excellent reputation for delivering a high standard of veterinary care in ambulatory and stud farm settings. We work with a large number of Thoroughbred stud farms in the flat racing sector, providing a comprehensive service throughout the breeding season. Our extensive artificial breeding caseload includes artificial insemination (AI) with chilled and frozen semen, embryo transfer and ovum pick-up (OPU). We also run a busy referral service for problem mares. As a fully ambulatory practice, we provide routine veterinary care and an out-of-hours emergency service to our clients.

Camaraderie, mutual support, pride in our work and a personable approach are central to our team's success. Looking after our staff matters to us, and we aim to promote a sustainable work-life balance for every member of the team.

The practice is located near the Curragh, within easy reach of Dublin and the Wicklow Mountains. We also help our vets find accommodation to make the transition as smooth as possible.

Long-term opportunities can be discussed with the right candidate.

What We Offer

- A progressive, supportive team committed to high standards of care, with a varied caseload focused on equine reproduction.
- A generous salary of €55,000–€80,000 per annum, pro rata, commensurate with experience.
- A shared, flexible rota, time off in lieu of weekends worked, and employee benefits.
- VCI and VDS registration.
- A fully equipped vehicle and access to high-quality diagnostic equipment.
- Opportunities to contribute to research projects and client education.
- Long-term opportunities for exceptional candidates.

What We Are Looking For

- A veterinary medicine degree recognised by the VCI.
- 1-2 + seasons experience in reproductive ultrasonography; experience in artificial breeding techniques is preferred.
- A team player with a proactive approach to collaboration and mutual support.
- Broad competence in general equine practice is preferred, as is previous experience in an equine hospital.

To apply, please send your CV and cover letter to sesveterinary@gmail.com or apply via our website: <https://sesequinevets.ie/>
